AIT-SIDI-SAID HAMZA

Software Engineer Lead - PHP / Laravel / Symfony

Lead Software Engineer with over 4 years of experience in the development, maintenance, and stabilization of business web applications. Specialized in PHP, Laravel, Symfony, React.js, SQL, Docker, and Linux, with experience in application transition, AMS/TMA, L2/L3 production support, incident resolution, and corrective and evolutionary maintenance. Available from early July for remote, freelance B2B, or relocation opportunities.

Work experience

Software Engineer Lead

From April 2025 to June 2026 [CAPGEMINI](#) CASABLANCA

UGI/AZ Mission:

- Contributed to the transition of ERP and digital applications: environment analysis, knowledge transfer, and coordination with internal and external teams.
- Provided L2/L3 go-live support: supported application launches, handled incidents, and provided functional assistance until stabilization.
- Deployed and maintained several PHP/Symfony applications across ERP and digital scopes.
- Delivered application enhancements, bug fixes, and performance optimizations.
- Contributed to the Invoicing project: designed and developed a billing module and supported the deployment phase.
- Implemented DevOps practices, continuous integration, and continuous deployment to improve release reliability.

Software Engineer Lead

From September 2023 to March 2025 [CAPGEMINI](#) Morocco

ENGIE Mission:

- Designed, developed, and maintained business applications for energy management using CakePHP.
- Created a new application from scratch, from the design phase through to production deployment.
- Managed incidents, bug fixes, and functional enhancements, actively contributing to application maintenance and operational stability.
- Integrated a front-end compliant with the FDS (Fluide Design System), following UX/UI standards and development best practices.

Remote Full-Stack Developer - CNPH

From August 2022 to July 2023 [CNPH](#) Marrakesh, Morocco

CyberCNPH Project:

- Designed, developed, and deployed the CyberCNPH solution, dedicated to cybersecurity management and monitoring.
- Developed the back-end using PHP/Laravel, following an MVC architecture and REST API principles, with structured data flows and secured exchanges.
- Built a modern and responsive front-end using Livewire, React.js, Tailwind CSS, and Alpine.js, with a strong focus on user experience.
- Implemented a microservices-oriented architecture and a continuous integration pipeline using Docker and GitHub Actions.
- Optimized application performance through Redis caching and SQL query optimization, while improving software quality by increasing test coverage.

Remote Full-Stack Developer

From May 2021 to May 2022 [Filovent](#) Boulogne-Billancourt, FRANCE

Filovent Project:

- Played a major role in the complete redesign of the Filovent platform, from functional analysis through to production deployment.
- Designed a modular and scalable application architecture based on Laravel 8 / PHP 8, with front-end component integration using React.js and Livewire.
- Developed core business features, including a high-performance search engine and secure booking workflows.
- Supervised and supported interns, actively participated in code reviews, and continuously contributed to product improvement.

Web Developer

From September 2019 to February 2021 [NJT GROUP](#) Marrakech

RADEEC — Government Project, NJT Group

- Analyzed, designed, and developed the RADEEC digital solution for online service management.

Thermody — Internal Solution, NJT Group

- Designed and developed a web application and API dedicated to temperature and humidity monitoring, used internally by the group.

Education

- **Bachelor's Degree in Distributed Information Systems (SIR)**
From September 2018 to August 2019 [FSTG MARRAKECH](#) MARRAKECH
- **University Diploma in Science and Technology — Mathematics, Computer Science, Physics, and Chemistry**
From September 2015 to July 2018 [FSTG MARRAKECH](#) MARRAKECH
- **High School Diploma in Physical Sciences**
From September 2014 to June 2015 [Mohamed El-Bakali Ait Melloul](#) Morocco

Skills

Backend

PHP, Laravel, Symfony, CakePHP, API REST

Frontend

JavaScript, React.js, Livewire, Alpine.js, Tailwind CSS, FDS

Data bases

MySQL, MariaDB, PostgreSQL, MongoDB, Redis

DevOps / Tools

Docker, Laravel Sail, Git, GitHub Actions, Linux, Windows, scripts Shell, CI/CD

Application Support

AMS/TMA, L2/L3 support, incident resolution, corrective maintenance, evolutionary maintenance, and technical documentation.

Methods

Application takeover, knowledge transfer, technical analysis, code review, and coordination with internal and external teams.
